21 April 64 25X

MFR on telephone conversation between [redacted]
X1 and [redacted], P&DS, on 17 April '64.

1. Doc stated that, regarding my request to Royce to have the copies of the reports numbered, [redacted] does not want 25X to assign control numbers. I told him that they had numbered the reports before they were classified and could see no reason for not continuing the system so that we could account for the copies. When he asked if I meant the 1 of 20, 2 of 20, etc, numbering, I told him that that system was all I wanted. He agreed to continue with this numbering system now that the reports are classified.

2. Regarding the same cost estimate [redacted] for 25X
both PAR-206 and PAR-207, Doc repeated [redacted] 25
X1 statement that [redacted] would start with a "round figure" and then add G&A and Fee to result in the "ROM" value the give us. He also stated that approval on PAR-207 was given on 27 Sep 63 in msg 3929.

3. The cost estimates on PAR-225 given in their message of the 14th are based on a one-time charge

X1 of [redacted] to get some film and to turn the equipment on. This charge would not be repeated for each group, X1 the charge of [redacted] is for training one group of four or five persons.

4. Regarding PAR-226, the word "average", in [redacted] message of 14 April, should be deleted. "Doc" stated that one mission might cost [redacted] 25X1 [redacted] feels that the estimate X1 [redacted] is the maximum any mission might cost
